### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the claimed invention as a whole including the suction pipes for introducing the air from the air cleaner being fixed to an inlet of the throttle housing on which the motor is mounted, wherein the word "fixed" is interpreted to indicate that the suction pipes are directly connected to the throttle housing inlet with no other elements located between the two, in the context of a suction device for an internal combustion engine comprising a collector into which air flows from an air cleaner through a throttle valve which is located in a throttle housing, and individual suction pipes for distributing the air to respective cylinders of the internal combustion engine from the collector, wherein said collector and said individual suction pipes are formed as an assembly body, and wherein the throttle valve is comprised of an electronically controlled throttle valve which is driven by a motor which is attached to the throttle housing, and wherein an outlet of the throttle housing on which said motor is mounted is fixed to an inlet of the assembly body..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
